

# MISSION POSSIBLE

Your mission, should you choose to accept . . . .

Did you know that the EPA estimates that 75% of the American Waste stream is recyclable? We only recycle about 30% of it! We generate 21.5 MILLION tons of food waste a year. What can you do?

- 1) Compost your leftover kitchen scraps and use it as fertilizer in your garden!
- 2) Recycling even ONE aluminum can saves enough energy to listen to a full album on your phone. Recycling 100 cans could light up your bedroom for two whole weeks!
- 3) Go to: [www.dosomething.org](http://www.dosomething.org) to join the global movement of young people wanting to make a positive change!
- 4) Go to [EarthCare at Foothills United Methodist Church](#) on Facebook and join our mission!
